## EDUCATION

### Stanford University

Master of Science, Computer Science

2023-2025, GPA 3.9 / 4.0

### University of Illinois at Urbana Champaign

Bachelor of Science, Computer Engineering

2018-2022, GPA 3.98 / 4.0

Minor, Computer Science

2019-2021, GPA 4.0 / 4.0

## PROFESSIONAL EXPERIENCES

### Amazon

Jun 2024 – Sep 2024

#### Applied Scientist Intern

Seattle, WA

- Working on LLMs for User Modeling.

### Amazon

Jun 2023 – Sep 2023

#### Applied Scientist Intern

Seattle, WA

- Worked on Large Language Models for Recommendation Systems. Developed a framework that uses a GNN-based recommendation model as a candidate item short-lister and a prompt-augmented, domain-adapted, and instruction-tuned LLaMA-2 13B model as a candidate re-ranker.
- The final model outperformed the baseline model that is used in the current product by a large margin on the metrics of recall@k and NDCG@k (k=5,20).

### Bosch Research

Mar 2023 – Jun 2023

#### Research Intern

Sunnyvale, CA

- Adapted open-sourced Large Language Models (LLM) to domain-specific chat applications. The motivation behind this is to create open-sourced alternatives for popular close-sourced chat LLMs, therefore alleviating concerns for private data security observed in the common API-based approach.
- Finetuned a series of Flan-T5 models that outperform the vanilla version and popular API-based chat systems on corporate-owned data. Applied techniques of domain adaptation and prompt tuning to inject domain knowledge into LLM while avoiding catastrophic forgetting of the general language capabilities.

### Microsoft Research

Jul 2021 – Jul 2022

#### Research Intern

Beijing, China

- Research: Focused on understanding semi-structured data (e.g., tables, forms, logs) with Natural Language Processing techniques. Produced 3 research papers submitted to ACL, KDD, and EMNLP. The PDF files, slides, posters, and code repo can be found at <https://liamjxu.github.io/publications/>.
- Production: Cooperated with product teams from Bing, Azure, and Excel on transferring research output into features for Microsoft products including Edge, Synapse Notebook, and Excel. Provided fundamental tools that allow 1) Bing to identify table fields for best visualization, 2) Azure to automate pivot table generation, and 3) Excel to intelligently assist users in generating analysis and visualizations for their spreadsheets.

### Discovery Partners Institute

Aug 2022 – Dec 2022

#### Machine Learning Engineer

Chicago, IL

- Added Semantic Search functionalities to a multi-source biomedical searching platform 1-Search.
- Finetuned a Biomedical-domain-specific pre-trained language model on a Learning-To-Rank dataset and evaluated the model on both public datasets and an internal dataset collected from 1-Search. Implemented pipelines for two downstream functionalities. Improved the inference latency from over 3 seconds to less than 2 seconds by utilizing dynamic model quantization. Served the model on an Azure virtual machine with TorchServe.

## COMMUNITY SERVICES

EMNLP: paper reviewer (2022, 2023), conference volunteer (2022).

ACL: paper reviewer (2023).

ARR: paper reviewer (Feb 2024, Apr 2024, Jun 2024).

# PUBLICATIONS

---

“\*\*” denotes equal contribution.

## Peer-reviewed Conference and Journal Publications

[P8] Word Embeddings Are Steers for Language Models  
Chi Han, Jialiang Xu, Manling Li, Yi Fung, Chenkai Sun, Nan Jiang, Tarek Abdelzaher, Heng Ji  
ACL 2024

[P7] SPAGHETTI: Open-Domain Question Answering from Heterogeneous Data Sources with Retrieval and Semantic Parsing  
Heidi C. Zhang, Sina J. Semnani, Farhad Ghassemi, Jialiang Xu, Shicheng Liu, and Monica S. Lam  
ACL 2024 findings

[P6] SUQL: Conversational Search over Structured and Unstructured Data with Large Language Models  
Shicheng Liu, Jialiang Xu, Wesley Tjangnaka, Sina J Semnani, Chen Jie Yu, Monica S Lam  
NAACL 2024 findings

[P5] Inferring Tabular Analysis Metadata by Infusing Distribution and Knowledge Information  
Xinyi He, Mengyu Zhou, Jialiang Xu, Xiao Lv, Tianle Li, Yijia Shao, Shi Han, Zejian Yuan, Dongmei Zhang  
ACL 2023 findings

[P4] Towards Robust Numerical Question Answering: Diagnosing Numerical Capabilities of NLP Systems  
Jialiang Xu, Mengyu Zhou, Xinyi He, Shi Han, Dongmei Zhang  
EMNLP 2022

## Manuscripts and Pre-prints

[P3] Reverse Image Retrieval Cues Parametric Memory in Multimodal LLMs  
Jialiang Xu\*, Michael Moor\*, and Jure Leskovec  
Submitted to NeurIPS 2024

[P2] InfoPattern: Unveiling Information Propagation Patterns in Social Media  
Chi Han\*, Jialiang Xu\*, Manling Li\*, Hanning Zhang\*, Tarek Abdelzaher, Heng Ji  
ArXiv, 2023

[P1] LUNA: Language Understanding with Number Augmentations on Transformers via Number Plugins and Pre-training  
Hongwei Han\*, Jialiang Xu\*, Mengyu Zhou, Yijia Shao, Shi Han, Dongmei Zhang  
ArXiv, 2022

# HONORS AND AWARDS

---

Brown Institute Magic Grant	2024
Microsoft Stars of Tomorrow Award	2022
Horace and Kate Wu Scholarship	2022
Daniel W. and Carol A. Dobberpuhl Scholarship	2022
ECE Visionary Scholarship	2022
Yunni and Maxine Pao Memorial Scholarship	2021
ECE Alumni Association Scholarship	2021
First Place, DARPA SocialSim Final Evaluation	2021
First Place, UIUC EOH Original Undergraduate Research Award	2021
Omron Scholarship	2020
UIUC, Dean's list	2018
UIUC, Edmund J. James Scholarship	2018
